

Q By selling 15 oranges, a fruit seller gains the selling price of 1 orange. Calculate his gain percentage. [mindtree]

A) 6.14%.

B) 7.14%.

C) 8%.

D) 8.41%.

Ans: - SP of 1 orange = 1
SP of 15 oranges = 15

profit = 1

CP = 15 - 1 = 14

profit % = $\frac{1}{14} \times 100$
= 7.14%.
